

## The 20<sup>th</sup> Congress of the Romanian Society for Radiotherapy and Medical Oncology A Continuous Challenge: The Gynecologic Cancers

September 30 – October 2, 2010  
Cluj-Napoca

### INVITATION

#### **Dear Colleagues,**

*On behalf of the Organizing Committee I have the honor to kindly invite you to Cluj-Napoca between the 30<sup>th</sup> of September and the 2<sup>nd</sup> of October at the 20<sup>th</sup> Congress of the Romanian Society for Radiotherapy and Medical Oncology.*

*The Congress offers an excellent opportunity for an exchange of experience and ideas among well-known professionals from Romania and abroad as well, in this extremely dynamic medical field - gynecologic oncology.*

*In the last years there has been substantial progress which queries the classical paradigms regarding gynecological cancer. The new discoveries in viral carcinogenesis and the preparation of anti-HPV vaccine open extremely important perspectives for the prevention and diagnostic of genital cancers. The development of imagistic methods and molecular biology techniques have refined the characterization of these lesions and opened new therapeutic perspectives, which together with the progress of classical methods (surgical, radiological and medical treatment) permit the personalization of therapeutic strategies in survival improvement, in terms of a quality of life superior than the previous decades.*

*On the occasion of this 2010 Congress, we also would like to celebrate its 20th anniversary since its foundation, offering a unique possibility for summing-up past research and for decisions regarding the future.*

*We invite you with great pleasure to this important event of the Romanian Society for Radiotherapy and Medical Oncology and assure you that your participation would contribute greatly to the success of the Congress.*

*Prof. Dr. Viorica Nagy  
RSRMO President 2010*
